ABSTRACT

Presented are the number of degrees granted by academic field and sex for public and private institutions. One tables presents an aggregation of the 50 states and the District of Columbia; a second table is a regional aggregation of the 14 states in the south (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia); and a table is given for each of the 14 southern states. Some analysis is given of trends over the past ten years. (MSE)

FOREWORD

Some of the more visible outcomes of higher education in the South are the degrees awarded each year by the nearly 900 institutions in the 14-state region of SREB. An examination of the changes which have occurred in the kinds of degrees awarded reveals much about the evolving structure of higher education in the South.

There has been a concerted effort among Southern states during recent decades to improve the quantity and quality of graduate education in the South. On a quantitative basis, this report reveals how successful that effort has been. However, it also highlights some disturbing trends. The continued overall growth in graduate degree production in the South, for example--which is counter to a national slowdown--threatens to exacerbate an oversupplied employment market. Increases in some fields tend to reflect escalating pressures for credentialing more than demand or need.

There are indications that students are adjusting their choices to the changing job market. Part of this responsiveness is due to increased information available to students. But, while the well-informed student is part of the solution, institutional responsiveness is also a factor. Some programs in which there are recognized needs for more graduates must turn qualified students away because of limits on resources, while programs with flagging demand and dubious quality are sometimes maintained at high cost and low productivity.

Student demand, however, is only one of several criteria for allocating resources in higher education. There are programs which should, and must, be maintained for their contributions to basic and applied research, to the arts and to public service needs. Program proliferation can threaten the quality of these programs too, as static funds are divided among more and more participants.

As the pattern of degrees awarded in the South becomes more like that in higher education generally, emphasis on correction of quantitative lags should give way to increasing stress on development of quality.

Winfred L. Godwin
President

INTRODUCTION

This report on Degree Output in the South, 1974-75, presents the number of degrees by academic field and sex for public and private institutions. Table 1 is an aggregation of the 50 states and the District of Columbia; Table 2 is a regional aggregation of the fourteen states; Tables 3-16, the individual states.*

The introduction which follows presents a longitudinal analysis of degree output in the United States and the South. Tables A through D summarize the changes from 1964 to 1975 by level for both the U.S. and the SREB states. Tables E through I examine changes during the 1970-71 to 1974-75 period in the South by level, field and sex.

THE CHANGING OUTPUTS OF HIGHER EDUCATION

During the past decade there have been significant changes in the output of higher education in the South. Tables A, B, C and D document these

---

*Degree output is reported according to its geographic location rather than the reporting state of the institution. For the SREB region this affects only the totals of Arkansas and Tennessee where the degree output for the Harding Graduate School of Religion, located in Arkansas is reported with the Tennessee total; and Maryland which includes the degrees granted by the U.S. Naval Academy and Antioch College Eastern Region and excludes Saint John's College, Sante Fe, New Mexico.

This report has been produced using the EDSTAT network established by the National Center for Education Statistics (NCES) which provides on-line computer terminal access to the full range of current Higher Education General Information Survey (HEGIS) data files, plus additional historical files. The network and its accompanying software programs allow quick access and manipulation of HEGIS data in advance of published reports. For further information contact the SREB research unit or the EDSTAT network office at NCES.

changes in the types of degrees awarded and the relationship of degree output in the South with that of the nation. Several significant trends are evident.

At the doctoral level, it is apparent that the South has essentially achieved the parity it has sought during the past decades. (Table A) In fact, there are indications that the region is out of step with national trends which show declining doctoral production since 1973. In 1975, doctorates awarded in the South accounted for 22 percent of the nation's output as compared to 15 percent in 1964 and 9 percent in 1950. The 7,226 doctoral degrees received in Southern states in 1975 represented 2.1 percent of all degrees in the region; for the United States, doctorates were 2.5 percent of total degree production.

Table A

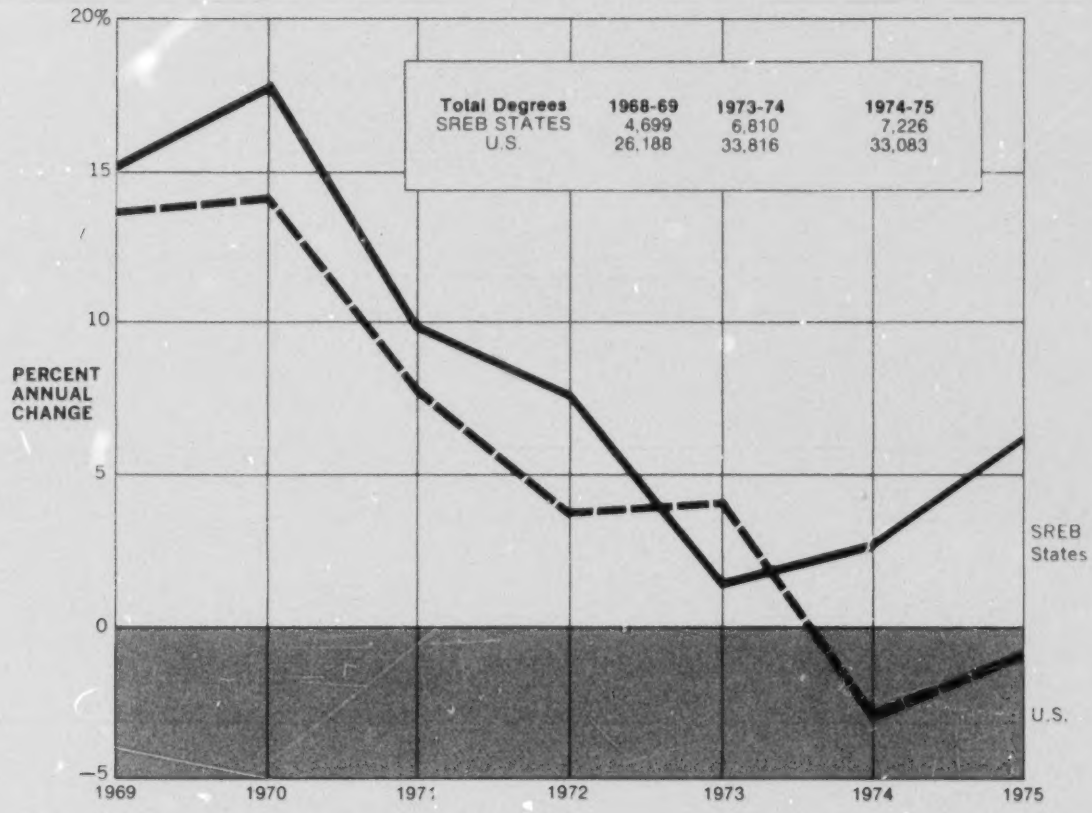
DOCTORAL DEGREES AWARDED 1964-1975

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	2,147	14.8		1.5	14,490		2.3
1970	5,542	18.6		2.1	29,866		2.8
1971	6,057	18.9	9.3	2.2	32,107	1.1	2.8
1972	6,529	19.6	7.8	2.2	33,363	3.9	2.7
1973	6,623	19.0	1.4	2.1	34,777	4.2	2.7
1974	6,810	20.1	2.8	2.0	33,816	-2.8	2.6
1975	7,226	21.2	6.1	2.1	34,083	0.8	2.6

Corrected copy, page vi: "Figure 1, however, shows how recent rates of change have differed in the South and the U.S. For the second year in a row, total doctoral output in the U.S. fell below the 1972-73 high."

Figure 1

ANNUAL RATE OF CHANGE IN DOCTORAL DEGREE OUTPUT: SREB STATES AND U.S. 1968-69 to 1974-75



Total Degrees	1968-69	1973-74	1974-75
SREB STATES	4,699	6,810	7,226
U.S.	26,188	33,816	33,083

SOURCE: National Center for Education Statistics, *Earned Degrees Conferred, 1967-68 to 1974-75*

the U.S. declined over the previous year. In the South, annual increases have been 2.8 and 6.1 percent during the past two years.

Master's degree production has been increasing at an even faster rate. (Table B) Annual increases in the South have been approximately 10 percent during the past three years. This is nearly double the growth rates experienced at the national level. In 1964, one of every eight degrees awarded in the South was a master's; in 1975, one of every five degrees. What was once an intermediate step to the doctorate has become a significant component of higher education in its own right, accounting for over 20 percent of the total degrees received in the South in 1974-75.

Table B

MASTER'S DEGREES AWARDED 1964-1975

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	18,219	18.0		12.8	101,122		16.4
1970	40,470	19.3		15.6	208,291		19.6
1971	46,177	20.0	14.1	16.7	230,509	10.7	20.2
1972	52,739	21.0	14.2	17.9	251,633	9.2	20.7
1973	58,542	22.1	11.0	18.7	263,371	4.8	20.7
1974	64,456	23.2	10.1	19.4	277,033	5.2	21.1
1975	70,706	24.2	9.7	20.7	292,450	5.6	22.4

The reciprocal of the rapid growth of graduate education is reflected in the slower annual growth of baccalaureate degrees. (Table C) In 1963-64, bachelor's degrees accounted for 79.2 percent of all degrees; in 1974-75, 73.0 percent. In the South, the 1975 annual increase was less than one

percent over the previous year; for the nation as a whole there was an actual decline in the number of bachelor's degrees received in 1975 as compared to 1974.

Table C

BACHELOR'S DEGREES AWARDED 1964-1975

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	112,524	24.4		79.2	460,467		74.5
1970	204,590	25.6		78.8	791,510		74.3
1971	214,589	25.6	4.9	77.7	839,730	6.1	73.6
1972	225,477	25.4	5.1	76.3	887,272	5.7	73.0
1973	235,593	25.5	4.5	75.2	922,362	4.0	72.6
1974	247,549	26.2	5.1	74.4	945,776	1.7	72.2
1975	248,849	27.0	0.5	73.0	922,933	-2.4	70.8

As for first professional degrees, their rapid growth in recent years has slowed considerably. (Table D) The South experienced less than a one percent increase in 1975 over 1974; the U.S., a four percent increase.

In short, the trends in degree production reflect a changed structure of higher education in the South, one which more closely resembles the nation as a whole. Further, as the nation slows in the production of Ph.D.'s, the South continues to grow. This trend is especially ominous in light of employment prospects for degree recipients at this level.

Table D

FIRST PROFESSIONAL DEGREES AWARDED 1964-1975

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees

1974	14,154	26.3	11.3	4.3	53,816	7.6	4.1
1975	14,273	25.5	0.8	4.2	55,916	3.9	4.3

ANALYSIS BY FIELD AND LEVEL

Tables E and F present the trends in the South in degree output by field and level. These changes reflect in large part a student's own perceptions of the changing demand for various types of occupational preparation. The data can be used both to provide information on that changing perception and in concert with information on demand to indicate areas of under and oversupply.

Bachelor's Level

The fastest growing areas at the bachelor's level during the four year period 1970-71 to 1974-75 were public affairs, computer and information sciences, interdisciplinary studies, and health professions. Fields usually found in arts and science schools showed declines--mathematics, social sciences, and foreign languages. Bachelors' in education showed a one-year decline. These trends in student choice generally confirm the findings of

SREB manpower studies of the projected demand for college graduates. It appears that students are increasingly becoming aware of manpower considerations and are shifting fields in response to the job market. Our assumption is that the higher education system is flexible enough to allow such movement but this is not always the case. Often institutions have not been successful in moving resources from unproductive programs to those in high demand. Unable to shift faculty from one program to another, some have chosen to limit enrollments in high demand programs, such as business, in order to protect student-faculty ratios. In these cases student demand will not be fully reflected in degree output.

Master's Degree Programs

As indicated earlier, the rate of growth in master's degrees has been greater than for any other level. Public affairs programs, with a 192 percent increase in 1974-75 over 1970-71 levels led all other programs. Computer and information sciences, health professions, and architecture programs also more than doubled the number of graduates produced. Unlike the bachelor's level however, education degree production at the master's level continued to grow substantially, with no signs of letting up. In 1970-71 education masters' accounted for 45 percent of all masters' granted in the South; in 1974-75 they accounted for 50 percent.

Small declines were felt by some arts and sciences programs--most notable was a 10 percent decline during the four-year period in foreign language degree production.

Doctorates

While a number of program areas with small degree production increased dramatically during the four-year period under examination (architecture, library science, theology, computer science), the greatest numerical increase came in the field of education. (See Table F) In 1974-75, 2,045 doctorates in education were awarded, a 51 percent increase over levels four years earlier. In 1974-75 education doctorates accounted for 28 percent of all doctorates awarded in the South; in 1970-71, 22 percent.

Interestingly, 45 percent of the regional increase is accounted for by private institutions in Florida, where education doctorates awarded rose from 26 in 1970-71 to 311 in 1974-75.

Declines in 1974-75 production from 1970-71 levels were felt by biological sciences, engineering, home economics, mathematics and physical sciences.

First Professional Degrees

Comparing 1974-75 levels to 1970-71, production of first professional degrees increased significantly. Optometry graduates more than doubled in number; law, dentistry, and medicine all showed substantial increases. However, one-year changes indicate a slowdown in growth in optometry and medicine and actual declines in veterinary medicine, law and theology.

ANALYSIS BY SEX

Tables G, H and I display the distribution of degrees according to concentration by sex. Fields are ordered by the percentage of the total degree recipients who are women. The tables reveal the increasing

proportion of degrees awarded to women at all levels. At the bachelor's level, women now account for 46 percent of total degrees; at the master's, 50 percent; the doctorate, 21 percent; and first professional, 10 percent.

There are changes in the fields in which women are receiving degrees as well. At the bachelor's level, women made gains in every field in which they were a minority the year before. The most dramatic increase was in the field of business and management where the women's percentage of degrees went from 15.7 to 19.3 in one year (an absolute increase of nearly 1,500 degrees in the region). Other fields where women have traditionally accounted for only a small percentage of degrees, such as engineering and agriculture, also increased on a percentage basis but still accounted for small numbers of graduates.

In most fields where women have represented the majority of degree recipients, there were small declines in their representation from 1973-74 levels.

At the master's level there were also small gains in the fields dominated by men. However, nearly two-thirds of all female degree recipients at the master's level, received their degree in the field of education.

At the doctoral level, where women account for less than half of degree recipients in all fields except home economics, there were few gains in fields with low female representation. Much of the increase in the female percentage of total doctorates came in the field of education.

Women remain the most severely underrepresented at the first professional level. There were, however, significant one-year changes in veterinary medicine and law.
